EVO

QUICK START GUIDE

3 Setups

Manual, Flywheel, Motion

MANUAL

If you use Rhino Slider EVO without Flywheel or Motion, remove the belt for a smoother slide

FLYWHEEL

For manual shots, use the flywheel for an ultra- smooth slide

ATTACHING FLYWHEEL

Remove the rubber o-ring (used for Rhino Motion)

ATTACHING FLYWHEEL

Place the Flywheel on the drive shaft

ATTACHING FLYWHEEL

Tighten down the set-screw to lock Flywheel in place

MOTION

Use Motion for responsive and precise control of your slider (refer to Motion Quick Start Guide for detailed explanation)

SETUP YOUR SLIDER

You can either use the built in all-terrain legs or mount it to a tripod

MOUNT YOUR CAMERA

Mount a flat based $\frac{3}{8}$ -16 ball or fluid head to the carriage and then mount your camera

PREPARE FOR SHOOTING

Unlock carriage brake and you're ready to start filming.

Note: When using Rhino Motion, it's especially important to make sure it's unlocked

STORAGE

To keep your slider safe during travel and between shoots, use Rhino Armor carrying cases to protect slider

MAINTENANCE AND CLEANING

To keep your Rhino Slider running smooth, keeping your rails and rollers clean is important

MAINTENANCE AND CLEANING

If you get excess amounts of debris built up you can easily clean your slider by removing the carriage and wiping off you rollers and rails with a clean cloth

Thank You for purchasing Rhino Slider EVO.
