**Verified CF card (EOS C300/C300PL)**

Last Updated : 27-Oct-2014  
Issue Number : 8202336800

**Solution**

It has been confirmed that the following CF cards are compatible.(October,2014)

| Manufacturer     | Product Name           | Capacity  |
|------------------|------------------------|-----------|
| SanDisk          | ExtremePro             | 256GB     |
|                  |                        | 128GB     |
|                  |                        | 64GB      |
|                  |                        | 32GB      |
|                  |                        | 16GB      |
|                  | Extreme                | 128GB     |
|                  |                        | 64GB      |
|                  |                        | 32GB      |
|                  |                        | 16GB      |
|                  |                        | 8GB       |
| HAGIWARA SYS-COM | Z III (UDMA5)          | 8GB       |
|                  |                        | 4GB       |
| Lexar            | Professional 1066x     | 256GB     |
|                  |                        | 128GB     |
|                  | Professional 800x      | 128GB     |
|                  |                        | 16GB      |
|                  | Professional 600x      | 8GB       |
|                  |                        | 16GB      |
|                  | Professional 300x      | 8GB       |
|                  |                        | 4GB       |
| Transcend        | 1000x                  | 128GB     |
|                  | 600x CompactFlash Card | 32GB (*1) |
|                  |                        | 16GB (*1) |
| Delkin Devices   | CombatFlash            | 32GB(*1)  |
|                  |                        | 16GB (*1) |
|                  |                        | 8GB (*1)  |

\*1:Proper operation has been confirmed for all modes except slow motion recording.

**IMPORTANT**

- These results cannot be guaranteed for all the ways in which the camcorder is operated.
- We recommend using a CF card that with a UDMA\* mode of at least UDMA4.

\* The Ultra Direct Memory Access (UDMA) specification allows data to be transferred between the CF card and device at high transfer speeds (measured in MBps).

**"Was this helpful?"**

- YES. It solved my issue
- It covered my problem, but the solution still didn't work for me
- The information on the page is hard to understand

It has nothing to do with my issue
